# Scribble MACHINES

- ① Add markers to a container
- ② build motor + attach
- ③ Test!

Make An Example:

secure to top of container  
edge of motor w/ glue stick leaning over the edge of container so it can spin

- place 1" of glue stick on motor tip, <sup>off center</sup> use tube to push hard
- wrap rubber band around battery, secure w/ tape for younger kids
- connect + wire from hobby motor to + end of battery (under rubber band)  
Repeat w. - side
